Continuation of Substance of Interview including description of the general nature of what was discussed: Applicant was asked to clarify the definition of a "anti-transformation." Applicant explained that an "anti-transformation" is any transformation used to return an object to its original state. It was suggested to the Applicant that the language "anti-transformation", in claim 1, be replaced with "inverse transform" for the sake of clarity. Applicant agreed. Applicant suggested amending the specification to clarify that an "anti-transformation" was the same as an "inverse transformation". The Office agreed.
